

Time to close the green public procurement gap

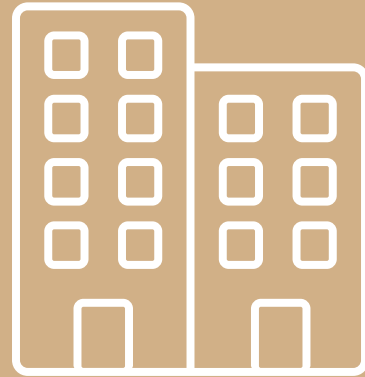

Anna Linusson, CEO Ecolabelling Sweden

Time to close the green public procurement gap!

Companies

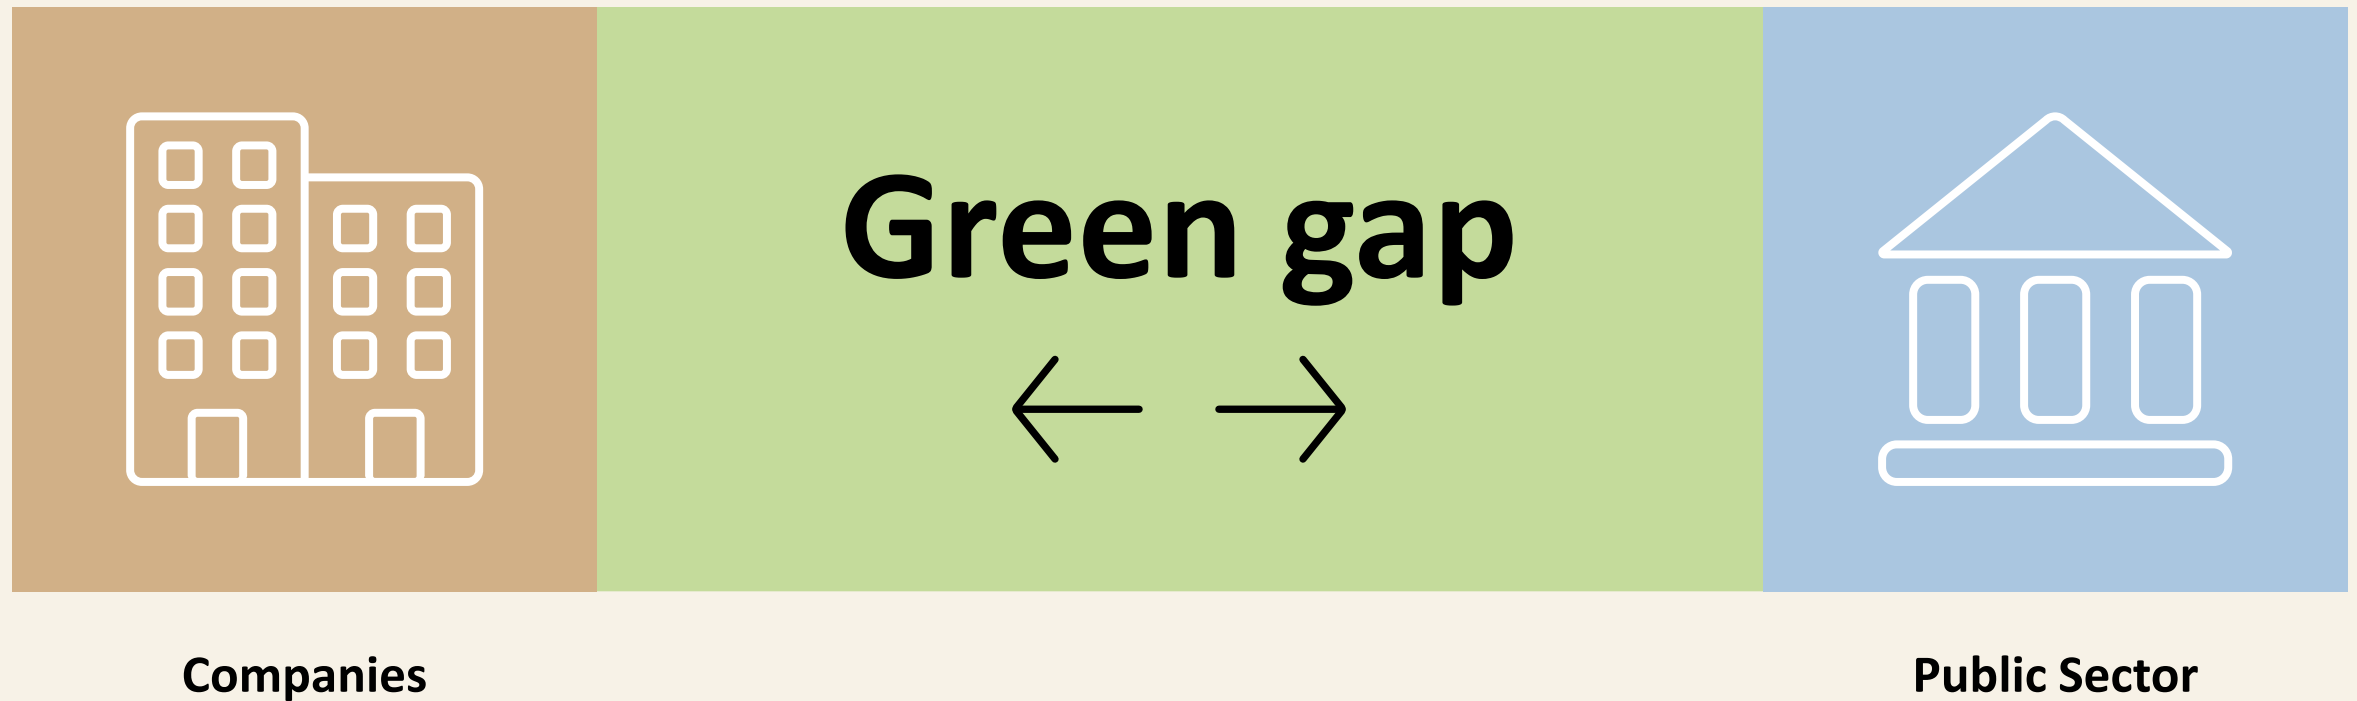

Public Sector

Today, there is a “green public procurement gap” between the top-performing companies in terms of environmental performance and the goods and services that are procured. This green gap must be closed if public procurement is to play a meaningful role in the green transition.

~~Not enough~~ products to purchase

- Not true! There is a broad range of products so the procuring organisation do not risk to be without products.
- 220 000 goods and services from official Type 1 ecolabels in EU: EU Ecolabel, Nordic Swan Ecolabel, Blue Angel (Germany), Austrian Ecolabel, Milieukeur (Netherlands) (ISO 14024).

Are ecolabelled products best in class?

By choosing a Nordic Swan Ecolabelled toner cartridge you contribute to:

44%
less CO₂
emissions

85%
reuse of the
components

New report:
